About

- Focus on conceptual foundations, basic tools, and confidence building
- Prepare for CSSS and other advanced courses in statistical methodology
- Get some introduction to programming/statistics in R
- Math skills through high school and algebra are helpful but can be reviewed
- Save lecture notes and web materials to review key concepts and tools later on

Recommended if

- Preparing for advanced CSSS statistics courses
- Interested in developing quantitative research skills
- In the early years of your graduate degree, or
- A current or incoming UW graduate student who wants a stronger foundation in math
